Adult Classes **Proper Function** of a Democracy

Yesterday's announcement of an adult training course at Hope high School this school year represents a timely advance for the

people of a democracy.

Locally it might be said to be the equivalent of the extension courses which the great universi-ties offer by mail throughout the nation, or the technical courses which are provided by some well known correspondence schools.

Like the university systems, the local program is paid for largely by public funds—free to ex-service men, but open to nonvertee men, but ope

Such tees are enarged by the national extension services, too.

But the main point in this development is that the adult school idea represents a logical extension of public services for the benefit of a self-governing people. The United States was founded as a republic whose people were supposed to keep informed about their government and its officials, which meant that the people had to be able to read and write and understand something of the abstract principles.

His three new endorsements are further examples of Mr. Shaw's famous nonconformity and per-verseness. Those qualities even show up in his brief encounter with the liver injections. He wrote the Vegetarians' candidate for vice president that he tried some injections 10 years ago to cure an attack of pernicious anemia. "Result— I dropped apparently dead twice," he reports, "and have not since had any injections."

Yet Mr. Shaw hedges enough in this vegetarian message to suggest that, at 92, he is beginning to mellow a little and admit that there can be other ways of thinking and doing besides his own. He confesses that he is still a practicing vegetarian. But he loesn't claim exceptionally good health, nor credit his long life to his diet. His forehears were meat caters, he says, and they

Cause Is Obscure

Iritis is something associated with rheumatism, diabetes, tuber-culosis, syphilis, or injury. Often, disappointingly, no cause what-ever can be found. The search for infection elsewhere in the body must be carried out painstakingly

and thoroughly.

The eye itself requires highly skilled treatment, including the use of drugs, heat applied locally, rest and protection from light. Sometimes a method called foreign protein therapy has been found belpful. This consists of injecof some protein substance, arm such as boiled milk, which produces reaction of the body, usually with fever. This seems to stimulate resistance, and often has a

invorable effect on the iritis. When anything goes wrong with the eyes, diagnosis and treatment should not be delayed, as the risk of permanent damage is grave.

New York to Get New Fire Alarm System

New York. Sept. 8 — 422 — A new fire alarm system, designed to case the strain on the jangled nerves of city firemen, goes into effect today.

Formerly, every alarm— an average of 250 a day — sounded in every firehouse, with the firebell clanging an average of 80 times for each alarm.

This clanging, the department said, has been a "decided factor in the high rate of cardiac and hypertension cases among firemenx x x."

A new selective transmission hook-up, to be used only at night until tested, will restrict the firebell ringing to stations in the zone where a fire is reported.

Heavy Death Toll During Holiday

BY JAMES MARLOW Washington, Sept. 8 —@—Death has a thousand faces, and he wore a lot of them on the highways the past few days.

At least 293 people were killed in automobile accidents over the Labor Day weekend.

I've just come back from a 2 600-mile automobile trip through the south and some of the things a saw would make your heart stand still.

I didn't see death outright. But I saw some of his disquises as he waited for a chance to pounce.

He was in the wind in the hair of a girl on the back of a motorcycle; he was in an old jalopy frudging wormlike up a busy hill; he was in a car that passed another on a curve; he was in a limp left arm. I saw maybe a dozen girls on the back of motorcycles, their arms tight around the man driver in

front of them.
The wind was in their hair, thrilling them, as they rocketed along, doing 60 or 65 miles on hour on a highway where the limit was 50.

At that speed on a busy road one slight twist of the front wheel, one brief skid, one ugly hole in the road could crash them into a ravine or an oncoming car.

Then there were the old jalopies, and the worst was the 10:00 All the News-M 10:15 Barclay Allen's Orch.-M
